Welcome to our office!

Welcome! We are glad to finally meet you! We have been working hard to educate the community about "subluxations" and chiropractic's powerful approach to great health and wellness, and your family has been on our mind.

On your next visit-Plan on approximately an hour for your "Report of Findings". At this time, we will explain and show you and your spouse the findings from today's spinal checkup and tell you if we can help you. We will outline how long it will take to correct your spine, how often you will need to be adjusted, and how much it will cost. You will be making important decisions that will impact you for the rest of your life.

If you are married-Your spouse must be present with you at the "Report of findings" so that he/she can see and understand the problems, our unique solution, and support you in financial decision making. **We will not review x-rays with patients whose spouse is not with them unless this has been discussed with the doctor prior to the report.** In the case of children under 18, both parents must be present unless discussed prior to the report or in the case of a divorce.

Our promise to you-We promise to give you the best chiropractic available, to answer every question to the best of our ability, to be relentless in removing nerve interference in your body, to care for your family as if they are our own, and to pray for you.
